Summary

Senior/Staff Frontend Engineer building React and TypeScript platforms for high-traffic consumer products. Leads architecture for modular UI systems, BFF services, and cross-platform workflow-driven experiences that reduced duplicated development, improved performance by 30%, and accelerated feature delivery by 40%. Guides engineers, raises code quality, and ships reusable components across multi-market launches.

Experience

Circles.Life (Senior/Staff Frontend Engineer)

Frontend Engineer

Singapore

May 2023 – Present

- **Project Leadership:** Led a team of 5 engineers to develop a cutting-edge for customer-facing checkout page used by millions of users globally.
- **System Architecture:** Architected and built a modular, scalable frontend system using React, Redux, Zustand, achieving a 30% performance improvement as measured by Google Lighthouse and performance testing.
- **UI Library:** Designed and implemented a reusable UI library for Circles Sass Web applications, ensuring consistent design language and reducing frontend code duplication through centralized components.
- **Cross-Platform Workflow-Driven UI:** Architected a platform-agnostic, conductor-driven UI framework that powers Web and Mobile from a unified workflow configuration, enabling teams to dynamically orchestrate, reorder, and modify user journeys without application deployments. Reduced duplicated platform-specific development, accelerated feature delivery by 40%, and enabled consistent rollout of experiences across 3+ markets.
- **GenAI Conversational Platform:** Built a GenAI-powered assistant integrated with internal systems, enabling users to query product and account information through natural-language conversations and improving self-service.
- **Middleware Development:** Developed and maintained a Java-based backend application that acted as a middleware layer between core microservices and frontend systems, managing data flow, business rules, and API integration.
- **Backend-for-Frontend (BFF):** Designed and implemented a BFF service using GraphQL and TypeScript to aggregate data from various APIs and serve optimized responses to frontend applications.
- **Monorepo Code Reusability:** Built and maintained a shared monorepo codebase comprising reusable UI components, shared state logic, and service integrations, enabling consistency and faster development across teams.
- **Code Quality:** Implemented coding standards and best practices, resulting in a 50% reduction in bugs and faster development, and more efficient code reviews focused on business logic over style and structure.
- **Cross-functional Collaboration:** Collaborated closely with backend teams, product managers, and designers to deliver features on time.
- **Product Launches :** Involved in multiple launches of telecom products across different countries, optimizing the front end for regional requirements and languages. ([Circles Australia](#), [Circles Singapore](#), [WimMx](#), [Onic](#))
- **Knowledge Sharing:** Created and managed documentation on Confluence, streamlining onboarding and supporting long-term code quality.

Optimum Solutions (Deployed at Circles.Life)

Frontend Engineer

Singapore

Dec 2019 – May 2023

- **Config-UI:** Designed and implemented a config-driven UI, enabling real-time appearance and localization changes without deployment, reducing launch time by 40% and supporting product rollouts across 5 countries.
- **Performance Optimization:** Spearheaded frontend performance optimization initiatives, reducing page load times by 50%, improving SEO rankings, and enhancing user experience across all platforms.
- **CRM Dashboard Development:** Developed an internal CRM dashboard to track orders and implement core business logic, enhancing operational efficiency.
- **Analytics:** Integrated user behavior tracking tools like Google Tag Manager, Adobe Analytics and CleverTap, driving a 25% increase in engagement and a 15% boost in conversions.

Nineleaps Pvt.Ltd

Frontend Engineer

Bangalore, India

Aug 2018 – Sep 2019

- **Migration:** Spearheaded the migration of a legacy system from AngularJS to React, resulting in performance improvements.
- **Mentorship:** Mentored junior engineers and conducted code reviews, fostering a culture of continuous learning and improvement.
- **UI/UX Enhancement:** Collaborated with UX designers to revamp the user interface, leading to a 40% increase in user engagement.
- **Test Coverage:** Developed comprehensive unit tests for React components, achieving 90% code coverage.

Hashworks Pvt.Ltd

Frontend Engineer

Bangalore, India

Dec 2017 – Jul 2018

- **Product Development:** Developed Product Groome, an HR and people management solution, utilizing ReactJS and Redux.
- **Ecommerce Application:** Developed an e-commerce application for the textile business using Angular.
- **Feedback-Driven Enhancements:** Regularly implemented improvements based on feedback, enhancing UX and delivering high-quality products aligned with business objectives.
- **Accessibility:** Ensured that web applications met WCAG standards by implementing accessible features, such as keyboard navigation, ARIA roles, and screen reader compatibility.

Tata Consultancy Service

Frontend Engineer

Bangalore, India

Nov 2015 – Oct 2017

- **Product Development:** Developed an investment web application using HTML, CSS, and AngularJS.
- **Responsive Design:** Created the responsive design layout for the website and mobile.
- **Automation Test:** Written automation testing code using Protractor.

Skills

- **Languages/Frameworks:** HTML, CSS, SCSS, JavaScript (ES6+), TypeScript, React, Next.js, AngularJS, Redux, Zustand, Node.js, Java Spring-boot, Express.js, React Query, Redux Saga, Redux Toolkit.
- **Tools/Platforms:** Webpack, Vite, Git, Docker.
- **Database:** MySQL, MongoDB.
- **Testing:** Jest, React Testing Library, Cypress.
- **Other:** RESTful APIs, GraphQL, Responsive Design, ESLint, Prettier, Cursor, Codex

Education

• CMR Institute of Technology

Bachelor of Engineering in Information Science

Bangalore, India

Aug 2015
